ABOUT US

AL WAHA CRANES is one of the leading quality supplier for industrial overhead, Gantry Cranes and material handling equipment in the Middle East and Africa Region.

We have over 4000 sq.m combined Gross Leasable Area which also houses our Head office in Sharjah, UAE. Having satisfied successful installation of more than 200 cranes serving diversified material handling applications.

With strong focus on continual improvement in our products and services we had established ourselves as most innovative, reliable and reputed supplier for bespoke material handling solutions viz. EOT Cranes, Overhead cranes, Gantry Cranes, Jib Cranes, Monorail hoists and free standing super structures.

Technical backup with street Cranes UK, we cater present market demand for energy efficient cranes as per latest BS/EN Standards.

OUR VISION

Be the best, most customer-focused and successful supplier for overhead cranes and material handling solutions.

OUR MISSION

It is the mission of Al Waha Cranes to promote technological advanced cranes with superior quality back up with 24x7 service support.

WHY US ?

There are plenty of reasons, as to why our clients choose to conduct business transactions on a repeated basis. Some of these reasons are enlisted below.

- Highly efficient and qualified team
- Safe and ethical business procedures
- Minimal design and development cycle
- Delivery of cost effective, international quality services on time
- Assurance of creative solutions.

OUR PRODUCT RANGE

● SINGLE GIRDER CRANE:

The single girder configuration is optimal for maximizing space in work areas range from 1Ton to 15Ton.

● DOUBLE GIRDER CRANE:

They reduce the load on the structure and they provide stability for the handling of heavy loads range from 3.2Ton to 250Ton.

● GANTRY CRANE:

Gantry Cranes are also known as Portal cranes or Goliath cranes and operate on floor mounted rails rather than a supporting gantry system as used by bridge cranes range from 3.2Ton to 250Ton.

● WALL TRAVELLING CRANES/ PILLAR JIB CRANE:

These are intermediate production crane feeding material for production line. Capacity ranges from 1 to 10 ton with cantilever from 5 to 8 meters. Jib cranes are designed for the connection between workplaces and the handling of light loads within the industrial process range from 1T on to 5Ton.

● SPECIAL CRANE:

The most critical cranes within a steelworks. They stand out for their high transfer and lifting speeds.

● MONORAILS:

Due to their design they provide the operator with mobility in a limited work space and thus improve the productivity of production lines.

● BELOW HOOK LIFTING ATTACHMENTS:

Telescopic / fixed C Hook- Coil lifting, Spreader Beams, Tongs and other attachments.

Fabricated and supplied as per individual customer needs.

● PROFILE RAILS:

Welding, Installation and alignment is done for profile rails.
